

ADJUVANT CRISTAL T

Riddling agent for manual or automatic systems.

→ OENOLOGICAL INTEREST

- Bentonite based riddling agent for automatic or manual remuage systems.
- Can only be used for traditional yeasts such as **LEVULIA CRISTAL** or **LEVULIA PROBIOS**
- Respects the analytical and organoleptic characteristics of the wine
- Allows optimal clarification of the wine after fermentation in the bottle in 7-10 days for bottles handled with automatic systems or 2 to 3 weeks for those with manual remuage.

→ COMPOSITION AND TECHNICAL CHARACTERISTICS

- Selected activated sodium bentonites
- Potassium bisulphite

For oenological use, in compliance with the International Oenological Code.

→ DOSAGE

From 60 to 80 ml/hl
Maximum legal dose according to current European regulations.

→ INSTRUCTIONS FOR USE

- Shake well the product before use
- Dilute by half with cold water
- Add with Venturi system during pumping over at least 50% of the volume of the tank, after the addition of the pied de cuvee
- Maintain constant stirring after addition

ADJUVANT CRISTAL T

→ ADDITIONAL INFORMATION
