

NXT Zymasil Cider

Active dry yeast for cider production

CIDER STYLES

NXT Zymasil Cider is a cider making yeast ideal for fermenting both freshly pressed juice and juice from concentrate to make sweet and fruity ciders whether low or high ABV. This yeast has a short lag phase while giving a robust fermentation to produce a cider with a fruity floral sensory profile that is dominated by the fruit.

AROMA & FLAVOUR CHARACTERISTICS

NXT Zymasil Cider gives a fresh fruity sweet aroma and flavour to the cider driven primarily by ethyl octanoate for fruity/floral notes that complement a single apple variety cider or a blend. Volatile acidity is very low, as is sulphur (H₂S) formation.

PRODUCT PROPERTIES

YEAST STRAIN	<i>Saccharomyces cerevisiae</i>
FERMENTATION TEMPERATURE	16-24°C 61-75°F
FLOCCULATION	Low
ALCOHOL TOLERANCE	15 % ABV
TOTAL ESTERS	Medium
H₂S (SULPHUR NOTES)	Low
POF (PHENOLIC NOTES)	Negative

AEB Cider Yeasts are tested to a high and rigorous standard and are released into the market only when all quality, safety and reliability parameters are passed.

MICROBIOLOGICAL PROPERTIES

Humidity	≤8	%
Yeast Viability	> 1 x 10 ¹⁰	Viable cells/g
Coliforms	< 10 ²	cfu/g
<i>Staphylococcus aureus</i>	< 10 ²	cfu/g
Lactic Acetic Bacteria	≤10 ⁵	cfu/g
Acetic Acid Bacteria	≤10 ⁴	cfu/g
Mould	≤10 ³	cfu/g
Non <i>Saccharomyces</i> Yeast	≤10 ⁴	cfu/g

AEB NEXT Yeast are tested to a high and rigorous standard and are released into the market only when all quality, safety and reliability parameters are passed.

PITCHING RATE / DOSAGE

Pitch the rehydrated yeast into the apple juice in the fermenter at a pitch rate of 20 g/hl of juice at 16-24°C / 61-75°F.

Pitch the dry yeast into the apple juice in the fermenter at a pitch rate of 30 g/hl of juice at 16-24°C / 61-75°F.

STORAGE

Store in vacuum sealed packaging where possible, in dry odorless conditions, below 30°C / 86°F.

Limit exposure to air. Do not freeze. On opening the package, the yeast should be used immediately.

Shelf life is 48 months from production date. Do not use after the expiry date shown on the pack.

PACK SIZE

Available in 500g net foil packs containing 1kg and in bags containing 10 Kg.

For smaller or larger volumes please contact AEB NEXT, visit www.aeb-group.com or the eCommerce platform via the website.

AEB Group is a leader in yeast, fermentation, enzymes, filtration, and eco-biotechnologies in the beverage and food industry.

APPLICATION

Rehydration of the yeast is recommended.

To rehydrate dissolve the dry yeast (20 g/hl) in sterile water plus 5% sugar (apple juice) at 36°C / 97°F at a ratio of 1:10. Stir gently and leave for approximately 20 minutes. Gently stir again and add more juice to cool down to fermentation temperature prior to pitching.

If yeast rehydration is not feasible the yeast can be pitched directly into the fermenter but at a slightly higher rate (30 g/hl).

To avoid yeast stress, ensure temperature fluctuations are minimal.

FOOD SAFETY

This product is GMO free.

This product is allergen-free.
