

E-FLOT SPARGER MINI & MAXI

System that allows the floated must to be spread evenly throughout the tank and in all types of tanks, regardless of the heaviness of the lees and the arrangement of the suction and delivery valves.

Consisting of a conveyor tube and plate with special grooves designed to spread the must 360° in the tank and optimize the formation of the cap. **It also facilitates bottom cleaning operations at the end of flotation to remove scum residues.**

E-Flot Sparger Mini

E-Flot Sparger Maxi
